- Built **reusable components** in **Vue.js**
- Integrated **RESTful APIs** built in **Laravel** and **PHP** with **Vue.js,** ensuring fast and secure data handling.

PROJECTS

WebFormify

WebFormify provides a platform where anybody can **build** and **customize forms** effortlessly using simple select sentence templates and **drag** & **drop** them to reorder. These forms will be installed by simple **copy-paste** method and **Embed** them on **any website** to capture **leads**, **collect feedback**, and **enhance user interactions**. And able to **customize** our **form theme** by changing the **colors**, **backgrounds**, **fonts**, **properties**, **buttons**, and much more.

Sitespedia

Sitespedia is a comprehensive **web management** platform designed to help users **organize** and **manage** their online **resources** efficiently. Key features include:
- **Notes and Tasks**: Maintain notes and to-do lists to enhance productivity and organization.
- **Bookmark Manager**: Save and categorize favorite websites for quick access across devices.

Screenshot API

A custom **Screenshot API** was developed using **Laravel Dusk** (browser automation tool), capable of capturing **website screenshots** based on a provided **URL** via **query** parameters. It supports various **customizable** options such as:
- Custom dimensions (resize)
- Image quality adjustment
- Full-page capture
- Element-specific screenshots using CSS selectors
